

Safire Natural Skincare Launches new product....

Organic coffee beans, vanilla essences and raw sugar are just some of the raw food ingredients used to make Safire Natural Skincare's **Mineral Body Scrub**. Inspired by ancient beauty rituals from around the world, from a time when beauty and health were treated holistically, our products and treatments enable a true connection between nature, our body, spirit and mind. "When you feel amazing, you'll look amazing", says Eleni Cardaci, Founder of Safire Natural Skincare, "humans are complex beings and we should consider what we are, who we are and what nurtures us. If we think of beauty as only skin deep, we are potentially ignoring all other factors that make us all truly unique and beautiful creatures".

Safire Natural Skincare offers a range of professional products and treatments that allow the therapist to get creative. Your clients will be mesmerized with the intoxicating aromas of exotic herbs and spices, fresh fruit extracts and native Australian essences. Safire Natural Skincare products are designed to offer clients not just a treatment, but an experience.

Safire Natural Skincare offers a generous markup on their exclusive professional and retail range together with comprehensive and easy to follow treatment guides, menus and other support material. With four exclusive, yet affordable packages to choose from, the Safire Natural Skincare range may be incorporated with existing salon/spa services allowing business owners to expand on existing services and treatments without incurring high costs. Safire Natural Skincare is the perfect choice for enhancing your client experience by incorporating health and wellness into your business.
